Seal-Tite
DUCT, PIPE & FITTINGS

America's Premier Air Distribution Systems

Model No. IFR In-Line Filter Rack

Model No. IFR is designed for easy installation between 2 sections of duct where mounting to the furnace is not possible either due to space requirements or requisite piping. This design promotes maximum airflow and spreads the air flow evenly over the entire surface of the filter greatly improving its performance. Filter sizes from 1" to 6" can be used for maximum flexibility. The filter door is fitted with a gasket and mechanical latch to eliminate all leakage.

Available Sizes

Duct Size	Filter Size
24x8	24x14
20x10	20x16
24x10	24x16
25x10	25x16

America's Premier Air Distribution Systems

Model No. 89 Support Cabinet

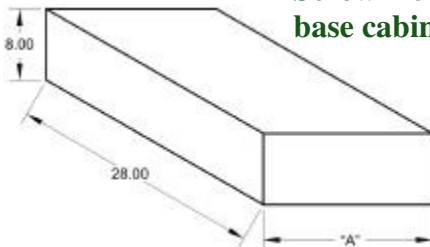

With Oversized RA Elbow

For Higher Tonnage Units

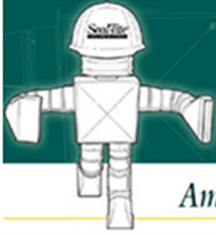

Model No. 148NF 20x25 to 12x25 Elbow Boot

This basic base cabinet is designed for a large return air boot to be utilized as a side and bottom return. Cut metal for base and side at least one inch from edge. For best results cut top support flange closest to RA Boot 1 1/2" and bend 1/2" flange down for additional support. Screw from blower compartment, unit to base cabinet.
