

Many local and state/province plumbing codes require the condensate to be neutralized prior to being discharged. Neutralized condensate prevents the corroding of drain and sewer systems while being more environmentally friendly. Saniflo's products can accomplish this by raising pH levels on harsh condensate from HVAC applications.

Increase your business with a quick and easy solution for the removal and neutralization of condensate from HVAC applications. With these quiet condensate systems, you can pump, neutralize or do both. Give your customers the ultimate solution...

The Saniflo condensate systems are easy to inspect and service making them the preferred brand for service companies as these can be included in their maintenance service contracts. By installing Saniflo systems, you easily save money on expensive damages caused to the plumbing, soil or sewer line because of harsh condensate.

SANIFLO IS THE WAY TO GO!

of Saniflo products.

SANICONDENS

Part# 040

- Pumps condensate from HVAC systems

SANICONDENS BEST

- Pumps and neutralizes condensate from HVAC systems

Part# 041

SANINEUTRAL

Part# 043

- Neutralizes condensate from HVAC systems

Part# 042

Saniflo's neutralizing granules neutralize the condensate by raising the pH levels of harsh condensate.

CONDENSATE
P U M P S

SANICONDENS[®]

Part# 040

The SANICONDENS is a small pump used to pump condensate away from condensing boilers, air conditioners, etc.

- One of the most powerful and quiet condensate pumps on the market
- The pump comes equipped with all the necessary hardware for easy installation and ready to install connections to an alarm system.

Discharge rate at 15':
30 gal/hour (114 liters/hour)

Discharge rate at 3':
86 gal/hour (326 liters/hour)

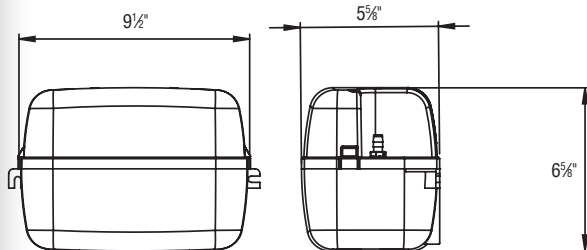

Discharge pipe diameter: 3/8"

Power supply: 115 V – 60 Hz

Amperage: 1.5 A

HP: 1/30

Temperature:
Maximum 160° F (70° C)

SANICONDENS[®] BEST

Part# 041

The SANICONDENS BEST is a pump with a built-in neutralizer used to pump condensate away from condensing boilers, air conditioners, etc.

- A powerful pump with a built-in neutralizer for harsh HVAC applications.
- The pump comes equipped with all the necessary hardware for easy installation and ready to install connections to an alarm system.

Discharge rate at 15':
30 gal/hour (114 liters/hour)

Discharge rate at 3':
86 gal/hour (326 liters/hour)

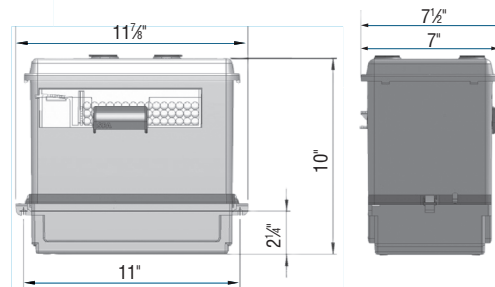

Discharge pipe diameter: 3/8"

Power supply: 115 V – 60 Hz

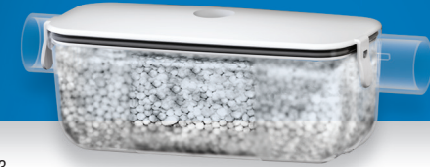

Amperage: 1.5 A

HP: 1/30

Temperature:
Maximum 160° F (70° C)

SANINEUTRAL[®]

Part# 043

The SANINEUTRAL neutralizes acidic condensate from condensing boilers, air conditioners, etc.

- Works without a pump or it can be placed before a Sanicondens or Sanicondens Best.
- Easy to inspect and replace neutralizing granules.

Operating temperature:
160° F (Max)

Boiler capacity: 170,000 BTU/hr

Boiler capacity: 50 kW

Connection diameter (inch):
1.5

Net weight (lbs): 3.7

Loads (lbs): 2.9
