Made in the USA

Polypropylene vs. Polystyrene

Camco -
Polypropylene:

Others –
Polystyrene:

High Impact polymer
(10x stronger than
polystyrene)

High Impact polymer

Flexible polymer

Brittle, breaks easily

Recyclable

Not recyclable

Non-toxic

Carcinogen

Camco's plastic pans for electric water heaters are injection molded to provide *superior strength and durability*.

Camco's aluminum pans for gas water heaters *will not rust or crack* and may be used for all water heaters.

Each round pan has a pre-cut side opening for drain fittings. For your convenience, fittings in choice of PVC or CPVC are attached to each pan. Both pan styles include 20", 22", 24", 26", 28" and 30" diameters.
