DID YOU PICK A PUMP THAT NEUTRALIZES CONDENSATE PROPERLY?

One of the most powerful & quiet neutralizing condensate pumps on the market!

Sanicondens® Best Flat

Avoid corrosive Condensate
with our neutralizing condensate pump

**500,000
BTU**

Pumps up to:
↑15 Ft ↑ and/or
←150 Ft →

Neutralize the Condensate: Most plumbing codes require...

Condensing technology saves energy by maximizing the amount of heat energy transferred to the water during the combustion process. A by-product of this process is water, or condensate, that tends to be acidic because of the chemical reaction...

WINTER IS HARD ON PLUMBING. PREP NOW.

Avoid Damage Caused by Winter's Bounty

While most people associate basement flooding with heavy rains, flooding can actually occur year-round. Leaks or burst pipes are common during the winter months, thanks to an accumulation of moisture. When you're checking your weatherproofing...

THE BLUE MONSTER HAS GONE ECO-FRIENDLY

Clean-Fit Products

Blue Monster® ZERO VOC Eco-Friendly PTFE Thread Sealant

Industrial Strength Eco-Friendly PTFE Pipe Thread Compound

ZERO VOC Thread Sealant

BLUE MONSTER® ZERO® is an industrial strength, eco-friendly PTFE-enriched pipe thread compound with zero VOCs, zero PFOA and zero lead. Blue Monster® ZERO® is an all-purpose, non-seizing thread sealant that is extremely effective on sealing all types of threads including galvanized steel, iron, brass, copper, aluminum, stainless steel, PVC, CPVC, ABS polyethylene and fiberglass.

With ZERO VOC content, ZERO PFOA and ZERO lead, Blue Monster® ZERO® is ideal for green buildings and LEED projects featuring environmentally-responsible construction. Blue Monster® ZERO® is certified to meet numerous approvals to ensure industry standards are met nationwide.

Product Literature

Use Blue Monster ZERO on pipes carrying the following:

R-410A REPLACEMENTS ARE COMING

What's Next: Specifying the Right R-410A Replacement

The HVAC industry has gone through refrigerant transitions before. Some may remember the move from R-11 to R-123, R-12 to R-134a, or, more recently, R-22 to R-410A. These progressions largely occurred to meet requirements designed to remove...
