Viega ProPress is the proven solution for nearly any industrial, commercial or residential project. With choices in sealing elements, system-matched tools, rings and jaws, press connections are made in seconds, making Viega ProPress suitable for many standard applications.

PROPRESS® 316

316 STAINLESS STEEL PRESS FITTINGS

SEALING ELEMENTS: EPDM

OPERATING TEMPERATURE: 0°F TO 250°F

PRESSURE: 200PSI

SIZE: ½" – 4"

Designed for Copper Tube Size (CTS), Viega ProPress 316 stainless steel is engineered for harsh industrial environments where the piping systems may come into contact with corrosive cleaning liquids. Viega ProPress 316 stainless steel is a great option for water, air, acidic, and cleaning solution applications while being light and easy to work with.

Smart Connect® Technology is built directly into each press fitting and helps identify any unpressed connections during system pressure tests.

Veiga's pipe fitting systems are subjected to the strictest quality and performance testing - including burst, vibration, and seismic. As a result, Veiga press systems have earned a litany of certifications from governing bodies across the U.S. and abroad.

With no hot work, fire watches are unnecessary. That means there's no need for additional manpower, plus you can skip the messy or labor-intensive tools.

Veiga products can be pressed in seconds wet or dry, a significant time savings over traditional methods. There is no need to drain the full system and pressure tests can be performed immediately.
