WHAT'S HAPPENING NOW

Volume 59 | April 2024

www.aprsupply.com

APR Supply Co. Editorial Vol. 11 - 6 Reasons Spring AC Tune-ups are Important for Your Customers

Most homeowners overlook the importance of scheduling regular spring air conditioning check-ups. Without any obvious issues, they may delay requesting a thorough system inspection and maintenance for several years. However, this mindset can potentially result in significant issues down the line, highlighting the necessity of emphasizing the importance of seasonal check-ups.

Indoor Air Quality Solutions: Why Choose UV?

For over a century scientists have known that certain frequencies of light have a devastating effect on microbial life. We now know that exposure to ultraviolet light in the range of 254 NM (UV-C band) disrupts the DNA of micro-organisms thus preventing them from reproducing, thereby effectively killing them.

Go Green!

6 Ways to Create an Eco-Friendly Bathroom & Kitchen

April means Earth Day is quickly approaching. While you may already have outdoor plans to celebrate Earth Day, there are plenty of things you can do indoors that are eco-friendly, too. The kitchen and bathrooms are often the most used rooms in the home, so it's a great place to start your "green" home makeover. Here are some eco-friendly upgrades to make your kitchen and bathrooms a bit greener this Earth Day and beyond.

Sump, Effluent, & Sewage Pumps: Tips for Selecting the Correct Pump for Your Installation

Selecting and installing a pump for a homeowner's sump and waste-management system is never a one-size-fits-all project.

For the professional installer, multiple factors need to be considered before choosing a pump, such as pump type, pump size, total dynamic head, and basin size, to name a few. If the homeowner has a high groundwater level and is prone to flooding due to spring thaw or heavy rain falls [sic], you may want to consider a sump pump sized for higher flow or head pressure to move that water away from your home and valuables. Also, if your customer has an older home and a smaller basin, you may want to consider a pump with a diaphragm switch with no moving parts.

Keep reading to get additional details on three standard pumps found in residential properties in North America—and which one might be the right one for your job.
