One Year
Extended
Labor
Warranty

Install a new Navien tankless water heater with a new PeakFlow[®] A or PeakFlow[®] C scale prevention system and extend your labor warranty one additional year¹

Warranty				
Application		Labor	Parts	Heat Exchanger
Residential	Standard	2 years ⁴ (1+1)	5 years	15 years
	Uncontrolled Recirculation ³		3 years	5 years
Commercial or Combi ²	Standard	2 years ⁴ (1+1)	5 years	8 years
	Uncontrolled Recirculation ³		3 years	3 years

¹All installation requirements for Navien water heaters and PeakFlow[®] products still apply. Navien water heater and PeakFlow[®] must be installed at the same time and registered online within 60 days of installation. Warranty rights will not be diminished for residents of any jurisdiction, such as California and Quebec, that prohibit warranty benefits conditioned on registration.

²Combi refers to a combination potable water and space heating application. Water heaters cannot be used in space heating only applications.

³Uncontrolled-Recirculation: External pumps configured to circulate continuously through the water heater are subject to the uncontrolled recirculation warranty terms. An aquastat is the minimum pump control requirement for DHW or storage tank recirculation in order to maintain the full controlled recirculation warranty.

⁴Base one year labor warranty plus one year extended for scale prevention system installation with either PeakFlow[®] C or PeakFlow[®] A (PeakFlow[®] S is not included).

For complete details please refer to the full warranty at Navieninc.com.
