

Fujitsu Next Tech and ETSD

YOU'RE INVITED.

This full-day, instructor-led, hands-on course provides technicians and installers with a technical overview of Fujitsu Halcyon mini-split systems, including the latest A2L-compliant models. Participants will learn key installation and application differences from traditional unitary systems, along with practical installation tips and requirements.

The course also covers inverter system troubleshooting, including multimeter use, DC controls and circuits, and diagnosis of Fujitsu outdoor unit circuit boards. Hands-on exercises and troubleshooting guidance help participants build the skills needed to properly install, apply, troubleshoot, and support Fujitsu mini-split products.

This class is a prerequisite for Fujitsu ASD trainings.

November 5, 2026
